

Review Google Chrome

Google LLC

Google Chrome is a cross-platform web browser from Google and you can use it for free. It is free and is currently one of the most popular Internet browsers. It combines a large number of convenient applications and extensions, but it is also popular with good speed range and high performance capability that do not fail

Google Chrome is an Internet browser. Its first version was released in **2008** after an editor of a blog specialized in the company's products disclosed information about an alleged book in comic book format illustrating a possible browser. On **September 1, 2008**, Google confirmed the entire story.

In less than two years of use, Google Chrome was the third most used browser in the world, behind Internet Explorer and Mozilla Firefox. In October 2010, about 8.50% of the world's Internet users kept Google Chrome as their primary browser. In October 2010, the browser had an 8.47% market share. It's available for free under specific service conditions". www.google.com. The name of the browser is derived from the term used for the graphical user interface ("chrome") framework.

Chrome is currently **the most widely used browser in the world**, with **49.18%** of desktop users, compared to 22.62% for Internet Explorer and 19.25% for Mozilla Firefox, according to StatCounter. The browser passed Firefox in numbers of users for the first time in November 2011, and Internet Explorer in May 2012, when it reached 32.43% of users. Two years after surpassing Internet Explorer in number of users, Chrome's advantage over IE was already 26.03%, reaching 48.63% of users.

Starting with version 28, Chrome stops using the WebKit as a layout rendering engine and starts using Blink, developed by Google. Google, a subsidiary of Alphabet, Inc. abandoned the development of new versions for Google Chrome in Windows XP and Windows Vista, on April 13, 2016, with the release of version 50.

Useful extensions that you can add when **downloading Google Chrome**

Because in the past few years the internet has really made web browser developers improve their products here, it's worth mentioning some of the most popular extensions to help you surf the web freely. Take a look at the following absolutely effective extensions for your Google Chrome browser.

Mercury Reader with this extension will block unwanted added ads, which can sometimes be really annoying. Clicking on its icon will make it easier for you to read or navigate a website, for example. This will allow you to adjust the background colors or font size to keep your eyes free.

DuckDuck GO is another interesting extension for anyone who wants to take advantage of safer Internet browsing. This is really useful because I can evaluate different websites based on your secure connection. Or encrypt a conversation when you deem it necessary. And this is great if you have never followed the cyber security rules.

The Camelizer is an aid to Amazon users because it can reveal the history of a product. Specifically, you will get detailed statistics on how the price of a product has changed. With this app, you will be sure to always make a deal for you. Or you can configure it to notify you if the price you want is reached, that you are willing to pay.

Midnight Lizard is another great way to protect your eyes from the very bright colors on the screen of your device. Have you ever had a headache, even when reading in front of your computer? By installing it and clicking on its icon, you can configure how to present web pages through Google Chrome. Note that you can also choose preselected

page layout palettes, which will reduce the burden on your eyes.

If you're having trouble choosing what to look for on Netflix, we know a prefix that will make it easy for you. Netflix Catategories is the perfect tool to find the next fascinating show. You can also save something to watch later, of course, if you don't have time to do it now.

Grammarly For Chrome can help people who have to write frequently. This application also works for many professionals because it checks their texts for errors. This extension can also work through Google Docs.

Another last extension that we will mention here is uBlock Origin, a very high quality software that blocks unwanted tracking ads. You can always go into a mode where you can block absolutely everything from one page.

Pros	Cons
- Speed performance and easy switching between tabs - Wide variety of extensions - Good design	- It may present incompatibility with some pages. - Unable to view history by dates - Need some extensions to work better
