

Review Brawl Stars

Supercell

Brawl Stars is an amazing action game, developed by Supercell. It's free and available for Android and iOS, which is amazing, because you can play it anywhere, anytime. It has a great variety of characters, a lot of action and many strategies. The game is easy to play and install, which makes it quite nice

Brawl Stars is a free mobile game developed by Supercell. The game is available for both Android and iOS, which is surprising and quite comfortable, because you can play anywhere, anytime you want.

The game has an interesting style of play. Like many other games, this one includes action and an amazing amount of strategies, which can help the player to get a deserved victory. The game is quite easy to play. The rules are considerably simple too. You control the game with two sticks on the mobile screen. The first controls the direction of your character and the second allows you to shoot at enemy targets. There is a separate button, which is for the hero's special attack. But, to use that attack, you need to gain enough power. After doing so, the button starts to glow, which means you are ready to crush the other players.

The variety of characters in the game is absolutely wonderful. Each fighter has an extraordinary appearance and a phenomenal personality. Except for that, each hero has a unique special attack, which accumulates over time. There is also a skill called "Star Power", found in the "Fight Boxes" while the fighter is playing or in the game store.

There is a wide variety of game modes. Each mode offers a great diversity of levels to play. You can play in a team game, where the main objective is to collect gems. To win the game, you must collect 10 gems for 15 seconds, which is great, because playing in a hurry gives the player more adrenaline.

Another great mode is Battle Royale mode. In that mode you can play alone or with a friend. There, you must deal with your target enemy players and be on the lookout for poison clouds, which can damage your fighter.

An amazing feature of Brawl Stars is the variety of everyday modes. Every day you have a place where you have the opportunity to find new and interesting ways, which is incredible. Also, finding a match to play is extremely easy. There are always players ready for a fight battle.

The game is definitely not perfect, but it has some amazing features that make it unique and enjoyable to play. But the game is surely not for everyone, it depends on the person if he likes that style of play or not. Another thing is the tension, which might not be enough for some players, due to some moments, which may seem predictable. Overall, the game is a lot of fun and has some solid sound effects and the graphics aren't bad. So if you're the type of person who likes this kind of games, Brawl Stars is the game to try.

Now let's classify here the 10 best fighters we will achieve by **Downloading Brawl Stars Free**

Upon reaching number 10 we have TARA. Tara is really very good, she has been at the top of the Bravo Meta for a long time. Definitely master this mode and with all the new maps coming out, their close quotes and good for tanks, good for you.

At number 9 we have Frank. Now Frank really does have a good contraption, he also dominates the fight ball and is also very good in the siege. It's pretty decent in gem, can't be used as a reward, and can be used occasionally in heist for showdown.

Number 8 goes for the penny is an absolute beast right now. Both star powers are very good, her device is obviously amazing and so Penny is just a very good seeker, you can use her in Brawl Ball Gem Heist Siege and Bounty. Very good overall, you can use it in showdown duo and there is always a way to beat someone with Penny.

At number 7 we have now, Nita has taken her place by having the number one device in the game. Now again, the gadget is unreal, it works in many different scenarios and Nita used to be a bit dependent on the map, so it was good in all modes, but it really depended on the map and then the mode, but now it is totally different. . Nita can absolutely master every map basically.

Coming to number 6, we have no other than Mr. P. Now since Mr. P. has been released, he has been a top 5 type of browser. Mr. P is just a good versatile fighter, very annoying, very restless but also a very good range, he can shoot at walls, he is good in all modes and actually quite good in showdown mode as well.

Number 5 is Max, who can create full dynamics around him just by the fact that he has very good speed and his device complements him very well. Max is really a good solid choice for whatever they want to do.

Next up is number 4, where Ems right now she is really flourishing and absolutely dominating the competitive game right now. Doing a very good job destroying all the tanks that are currently in the meta, also your device is super good as it complements Ems very well.

Sandy is at number 3 Sandy has been one of those fighters who has been at the top of the goal for a long time. You really don't want to face Sandy because it's one of the most annoying things in the game. She is good in all ways outside of reward like all of these top fighters.

At number 2 is Gene, who is an absolute beast. He's super good at Siege-based control, super good at Bravo, decent at Heist, and absolute god at Bounty. Probably the most complete fighter in the game right now.

Upon reaching number 1, it comes as no surprise that Jacky first entered the game: absolute domination, nothing can take him on, just an absolute beast.

Pros	Cons
- Free - There are many game modes - Keeps up to date - You can meet people	- Connection problems - Slow loading - The best updates are paid
